

GHERAS INTERNATIONAL SCHOOL

خطة الطلبة الموهوبين والمتميزين

2022-2023

Gifted and Talented Student's Plan

Objectives:

- Early identification of the manifestations of talent and gifts among GIS students.
- Identify the students' educational, health and social needs to maintain and develop their superiority and talent.
- Develop the talents and abilities of the gifted or superior student.
- Build bridges of cooperation between home and the school to coordinate the aspects of care.
- Make the talented student an example to his colleagues to arouse their energies and talents.

Methods and Activities:

Provide a database of the psychological examination results for super and talented students - Inventory of outstanding and gifted students from national students.

- Make lists of their names and hang them in the classrooms and the school bulletin board.
- Apply and employ the tracking card prepared by the Department of Superiors in the Ministry.
- Activate the role of resource rooms in the school by providing innovative thinking programs: Kurt, Pamela, and the abbreviation of the curriculum. And strategies for teaching the super and talented in regular classrooms.... etc.

GHERAS INTERNATIONAL SCHOOL

2022-2023

Who is a talented student?

A talented student has an extraordinary aptitude, ability or performance distinct from the rest of his peers in one or more fields, especially in the areas of mental excellence, innovative thinking, special skills and abilities, and needs special care that is not available to him in an integrated manner in regular programs and is selected according to the unique scientific bases and standards determined according to the procedures of the program of detection and care of the gifted.

Talent Discovery:

The detection process is one of the most critical stages in the program because it aims to identify talented students and provide them with appropriate educational services and programs which meet their needs, challenge their abilities, and develop and develop them.

The importance of disclosure is evident from its contribution to:

Adjust the enrollment system in special programs for gifted people, determine the type and level of talent, which helps to identify the needs of talented students, and guide students to the most appropriate programs to develop their areas of excellence.

Therefore, Gheras International School has worked to develop the criteria for the nomination and selection of several school students according to the best local and international standards.

2022-2023

Nomination Stage:

- Get a high score on the IQ test.
- Scientific excellence and high achievement.
- Motivation through the nomination of teachers (class goers).
- Students possess different tendencies, skills, and talents.
- Be a student to whom the attributes and characteristics of gifted people apply.

General Aptitude Testing Stage:

In it, measure the detection of students' interests and cognitive needs and measurement of evaluation of creative skills are applied.

Sorting stage:

Students are screened, and the best of them are selected and prepared for admission to the program.

Gifted Student Sponsorship Strategy:

The strategy of caring about gifted students is based on the grouping of the talented. It allows the education of gifted people with similar preparations, converging tendencies, and similar or common special interests in homogeneous or heterogeneous groups to achieve as much academic progress as possible in their studies and to grow their talents.

There are many enrichment methods in the programme, including the following:

Training in various skills.

Develop creative thinking.

Research and special projects.

Hobbies and competitions activities.

GHERAS INTERNATIONAL SCHOOL

2022-2023

Teaching and learning methods in the programs:

Learning by discovery.

Collaborative work in groups.

Research, inquiry, dialogue and discussion.

Practical exercises and projects.

Brainstorming and solving problems in creative ways.

The content of the enrichment program:

Enrichment programs seek to provide an integrated psycho-human social, and educational experience, focusing on cognitive content, scientific and mental skills, and recreational and social activities.

The enrichment program addresses the following areas: motivations, learning skills, thinking skills, research skills, and social skills.

Role of the Gifted Students Welfare Committee at the school:

1. The Committee for the Welfare of the Gifted aims to identify the talented students in the school to scientifically care for them matching their abilities and potentials.
2. provide psychological and social care, raise awareness of teachers and parents of gifted students and the characteristics of their children, activate school programs and services to achieve the required goals, highlight and develop their talents and abilities.
3. create a school environment commensurate with this category, and benefit from the potential of universities, colleges and specialized centers to benefit talented students and develop their abilities and talents.

2022-2023

The programs of the Gifted Welfare Committee include:

1. Multiply the learning of basic skills based on students' faculties, not their age: by focusing on intelligence, mathematical logic, and linguistic intelligence.
2. Qualifying 15 talented students to participate in external competitions: through workshops and specialized programs.
3. Apply the comprehensive model to integrate multiple intelligences, students' preferred learning styles, and gifted students' characteristics and qualities, and nominate (22) students to join the Gifted Care Center in Doha.
4. Developing Higher Thinking Skills: Through the Kurt and Mind Maps program, in workshops characterized by positive interaction from talented students.

- **Development of Creative Behavior:**

1. Where we applied two local and international test models, the target group is to grade primary to elevate students' creative thinking.
2. Develop internal motivation towards achievement: research competitions and projects are applied, and life mathematics is conducted for fourth, fifth and sixth-grade students.

- **Gifted Channel:**

It is concerned with developing the talents of students in the field of journalism and media, and providing the talented students with the skills of dialogue, opinion, and other communication skills.

2022-2023

Future Vision:

The Gifted Welfare Committee adopts the principle of treating all students as scalable, following a systematic and educational plan that clearly expresses the goals and expectations of students at different stages.

Talent teachers create a classroom environment in which students are engaged in the search for their talents and interests through personal discovery.

The ability to make trade-offs and the right choice, active participation, building students' self-confidence and developing the motivation needed to become good learners.

Program Features:

1- Providing exceptional educational and academic services aimed at developing the educational process for talented students and meeting their different needs.

2 - Provide opportunities for students to grow integrated, discover abilities and tendencies and develop experiences and skills which contribute to the country's service.

3- Preparing tomorrow's leaders by paying attention to talented innovators.

4 - Raising the awareness of talented people about local and global problems and imposing solutions to them by:

Train them how to think, research, proper planning, scientific thinking, innovation, discovery, renewal and invention.

Develop environmental awareness and discover scientific methods to preserve the environment.

Invest all the energies in the gifted and talented students and highlight them through appropriate educational opportunities in cooperation with the Academic principal and class teachers.
